

I oppose any legislation that tries to stifle competition by not allowing a service that I agree to pay for to not be allowed to compete for a service in a free competition marketplace. I support local broadcasting by choosing to support their advertisers if I so desire but do not want any barrier place that stops my right to services that I agree to pay for!
Stop the nonsense and do not support those who wish to impose their will and dollars on stopping free enterprise by government mandate! Let the competition begin!
